**Alliance Health Education Initiative Grant Report  
October 7, 2015**

The Good Samaritan Health Centers, Inc. requested grant funds to obtain materials and supplies to support our women's healthcare clinics and our outreach clinics. We are pleased to report that we have been able to increase these services throughout this past year. Last year, 74 patients were seen in our women's healthcare clinics. In 2015, we have already seen 66 women in our women's healthcare clinics, with 3 months remaining in the year and three more clinics scheduled this month alone! Our outreach program, which provides blood pressure screenings and community resources to the homeless population, has also grown, from serving 1,778 in 2014 to already 2,193 encounters so far in 2015!

Your grant funds have specifically aided our mission by affording us the resources to provide 60 cans of bug spray to homeless individuals, as well as helped to provide wound care to 55 homeless individuals. These services have aided in keeping these individuals out of the emergency room and have avoided unnecessary hospitalizations. In addition, your grant funding provided the resources to provide women's healthcare, including pelvic exams, PAP smears, and breast exams, to 45 women so far. Patients will continue to benefit from the women's healthcare supplies purchased with these grant funds for the remainder of this year and the year to come.

Our clinic provides unique and unduplicated services to those who cannot otherwise afford medical care, with a particular focus on specialized services such as women's healthcare and outreach services reaching the homeless population. Your generosity is truly appreciated by our patients and providers alike! Thank you!
